

Sahara W - Absorber

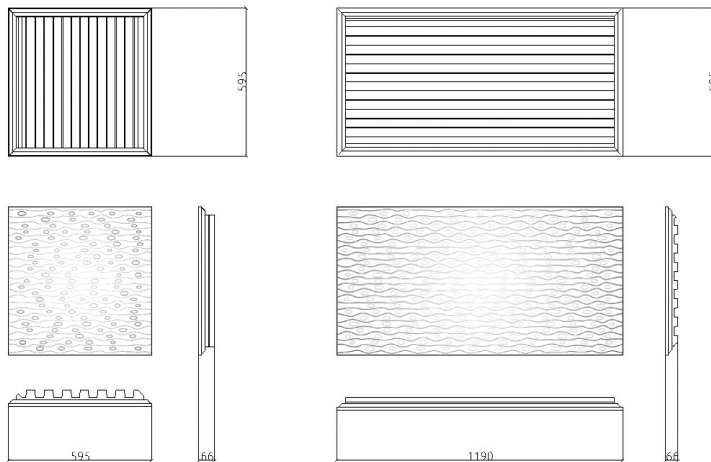

Absorption
HIGH END

Description

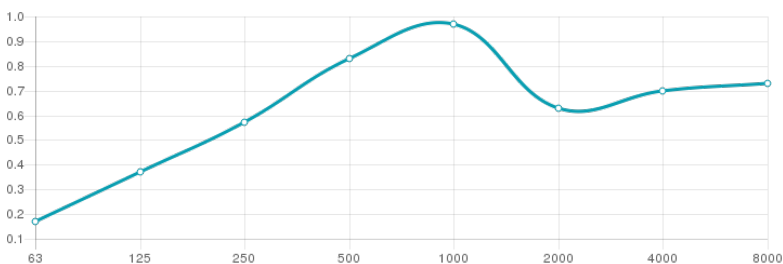

Sahara panels are the forerunners of the next generation of acoustic panels. Completely adaptable. Completely customizable. Unique for each environment. A good acoustic treatment lies in the correct ratio between absorption and diffusion. Sahara can regulate both, without changing its seamless organic pattern, allowing you to fully embrace the architectural style of your space without worrying about different panel placement.

Sahara's secret lies in its organic pattern, allowing you to increase the absorptive areas and change the morphology of the diffusing ridges, producing a panel truly tailor-made to your needs.
