

dBa Tape

The dBa Tape is a cork and recycled polyurethane granulate wall bearing designed to effectively interrupt the transmission of structural and impact noise between wall and floor. As it withstands a significantly high and wide workload range, it is recommended for concrete block or brick wall constructions. The dBa Tape is also a very good thermal insulator.

Performance

This product is available in the following Fire Rate:

FR | Fire Rated

PRODUCT COMPOSITION:

dBa Tape

- Cork and Recycled Rubber

TECHNICAL INFORMATION:

- Density [kg/m³] = 250 | ISO 7322

- Tensile Strength [kPa] > 100 | ISO 7322

- Workload [kg/m]:

Min: 500

Max: 2150

Roll Dimensions:

- 10000x50x5mm
